

Dear Sirs:

The fact that CNN had two different broadcasts during the war, one for Europe and one for the US, should be PROOF to all, of how the large corporate media giants filter our news. UNFILTERED news is essential to Americans in order to achieve an effective democracy. Creating law that will allow even more consolidation will result in more filtering, and this is just not acceptable.

The FCC should protect Americans and democracy, not corporate interests. The FCC should be reminded of the reasons for preventing monopolies. This is a critical issue. Please do not take action that will undermine our democracy.

Thank you.
